At Ken-Mac Metals we keep things simple

Material Solutions for the Aerospace Industry

In the dynamic aerospace industry, Ken-Mac Metals stands out as a trusted supplier, where precision and reliability are essential. We offer a full range of high-quality materials, with a strong focus on light gauge products engineered to meet the demanding standards of aerospace applications. With tight tolerances and dependable inventory, we help ensure your projects move forward with accuracy and efficiency.

We operate under a continuously tested system of quality assurance procedures to deliver the highest level of consistency and performance. Backed by industry expertise and a commitment to excellence, we are your choice for quality materials, reliable service, and a true partnership in aerospace success.
