

thyssenkrupp Materials NA
Manufacturing Services Division

Fabricated Components

for the Electrical OEM Industry

Standard Repetitive Parts and
Engineered to Order (ETO) Manufacturing

thyssenkrupp

Taking fabrication services to the next level

thyssenkrupp Materials NA Manufacturing Services is the premier choice for high quality copper, aluminum busbar and GPO3 components. Servicing the electrical OEM market with strategically located facilities across North America, we are dedicated to helping our customers meet all their production and service needs.

We produce and deliver parts on a JIT basis to companies across the United States, Canada, and Mexico.

As one of the leading value-added suppliers to the North American electrical industry, our capabilities include fabrication of standard and engineered (custom) components utilizing CNC controlled punching, bending and cutting equipment for use in the assembly of:

Low, Medium and High Voltage Switchgear

Switchboards

Arc-Proof / Arc-Resistant Switchgear

Transformers

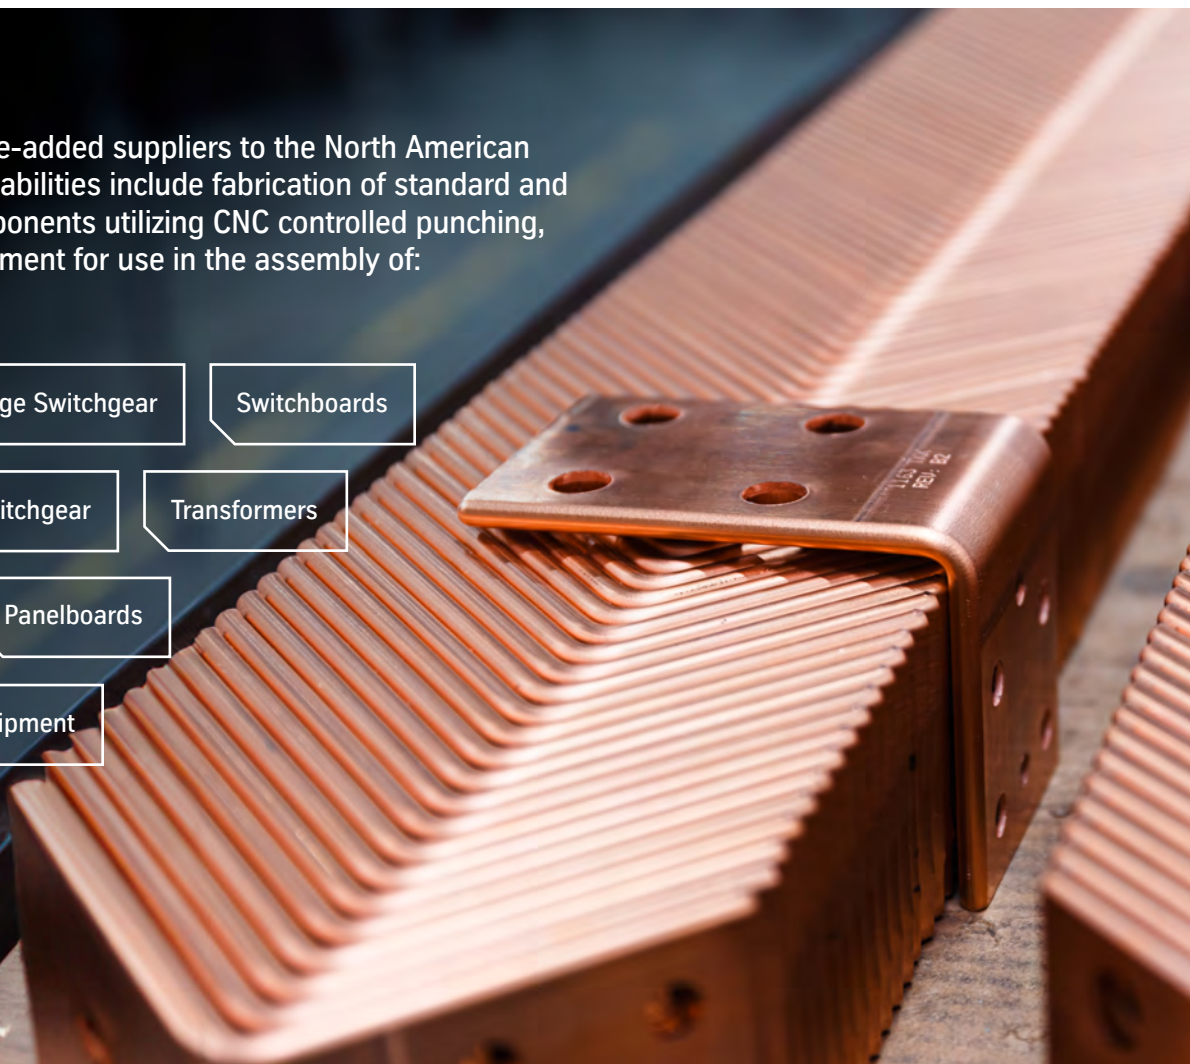

Motor Control Centers

Panelboards

Power Factor Correction Equipment

Utility Compartments

Bus Duct

Complete In-House Capabilities

Originally launched in 1974 as Peckovers Manufacturing, thyssenkrupp Materials NA Manufacturing Services has expanded into a multifaceted fabricator of a broad range of electrical components such as copper and aluminum bus bars and connectors, insulation (GP03) devices, and much more.

Our expertise encompasses the following capabilities:

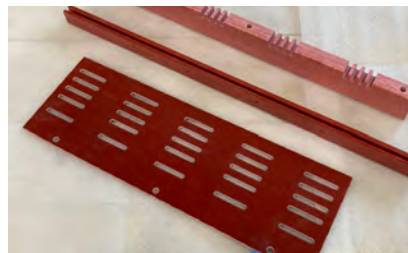

- Copper, Aluminum and Glastic CNC Punching
- CNC Cutting — Water Jet, Routers, Precision Table and Panel Saws
- Cutting, Milling and Machining of GP03 and Formex
- Assembly of small and medium sized electrical components
- JIT delivery of custom engineered and fabricated products
- Raw material to finished goods stocking inventory programs
- Subassembly kitting of components
- Returnable containerization programs

Other processes currently offered, either in-house or readily available, include:

- Silver, Tin, and Nickel Electroplating
- Plastisol and Epoxy Bus Bar Installation
- Brazing and Welding

Subassembly Kitting of Components

We offer the convenience of kitting all components needed for your switchboard/switchgear in just one step. Reducing inventory, wasted movement and excessive paperwork for our customers. We'll get you what you need, packed together, and delivered to the point of use.

Focus on Customer Service

thyssenkrupp Materials NA Manufacturing Services has built a strong reputation for delivering exceptional customer service, which is evident from the numerous “best supplier” awards in delivery, quality, and customer service it has received over the years. Currently, our growth strategy is focused on providing customer-centric solutions with great attention to detail.

We are proud to have a team of over 100 skilled and committed professionals who work tirelessly to deliver the best outcomes, including production associates, engineering support personnel, and customer service representatives. Our team is our biggest asset, and we constantly strive to provide them with a work environment that allows them to achieve the best results.

Contact us today to experience our commitment to superior products, services, and customer care. thyssenkrupp Materials NA Manufacturing Services is ready to answer any questions you may have and provide tailored solutions that meet your specific needs.

**Our strength is our people,
our commitment is customer satisfaction.**
