

thyssenkrupp Engineered Plastics Advantage

Value-Added Processing Capabilities

Take advantage of our value-added capabilities as well as our extensive experience.

NC Sawing

thyssenkrupp Engineered Plastics offers precision sawing services on all materials using state-of-theart NC equipment.

CNC Vertical Machining

Our state-of-the-art CNC vertical machining centers can drill and tap holes, mill down top and side surfaces, mill angles, radius edges countersink, and counter bore.

CNC Turning

Our CNC lathe with live tooling can turn down OD and bore out ID, drill and tap holes on the OD, drill and tap holes in the ID, mill flat surfaces on round bar, mill angles on round bar, make square rod round, radius edges, and cut-to-length.

CNC Routing

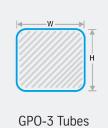

Our dual-head CNC routers allow us to run two identical parts on the same machine at the same time for increased efficiency. A vacuum table holds the work piece without clamps or vises. Capabilities include circles, discs, square or rectangular parts, mill down surfaces, radius edges, drill, countersink, and counter bore holes.

Fabrication Services

Working closely with customer design and material engineers, thyssenkrupp Engineered Plastics offers additional value by fabricating, polishing, bending, and gluing parts to exact customer specifications. Our customers save both valuable time and money by having these first-stage processing steps completed and delivered just in time to their door.
